ISTA 3A Testing | Keystone Compliance

To find ISTA Certified Labs based on procedure capability, use the filters below. Please note the search criteria works as a filter and will restrict your results to labs that have all capabilities requested. As an example, if you select "Y" for 3A and "Y" for 3E, the search results will only show labs that are certified to perform BOTH 3A & 3E.

International Safe Transit Association - ISTA

ISTA 3B requires a minimum of 1 sample to be tested. For final packaging design purposes a higher number of samples is recommended (ideally 5 or more). However only testing one sample is mandatory to establish compliance. For unitized loads of the same product shipped by truckloads, you should also consider ISTA 3E or ASTM D4169 tests.

ISTA 3B is a packaged products test - Micom Laboratories

Summary. This procedure has been designed to provide a standard set of tests to understand individual package / product performance when shipped through small parcel services such as UPS, FedEx or the US Postal System (for example).
